

HENDO

DECORATIVE WALL PANELS

HENDO IS A BRAND OF

MECH-ROL-PLAST

HENDO WALL PANEL
individual pattern

Mech Rol Plast is a family business with traditions. Operating for over 50 years. Initially, the company's activity was related to the development and mechanization of agriculture.

We started processing plastics in the 1980s. Taking care of continuous development in this field, we soon became a leader on the Polish market. Currently, the company produces insulation materials and interior decoration products.

Investments and a well-thought-out strategy have led to the creation of high-quality panels and strips of the **HENDO** brand, based on mineral ingredients.

From the very beginning, we took care of the natural environment. We place a strong emphasis on closed-loop production. We follow contemporary global trends in this field. We operate on the basis of waste-free production, which means that all waste is recycled and managed at the place of production.

We apply the principles of REUSE, REDUCE and RECYCKLE. We are still looking for better solutions that are beneficial for the environment and people. In the production process, we use energy obtained from renewable sources.

We give young people a chance for development by supporting education.

We actively contribute to the development of the Faculty of Arts and the fields of study Design and Interior Architecture of the University of Social Sciences in Poznań.

At the professional and secondary level, we train highly qualified professionals.

We organize trainings and workshops as well as prepare educational publications and instructional videos.

We have a great merit in protecting the European cultural heritage. We rebuilt the historic palace and park in Psie Pole. We received an award from the Ministry of Culture for this.

We support and finance charitable and philanthropic activities on the local market. We are a patron of art and culture.

We build good relationships for the future with business partners, including them in joint initiatives for the development of the young generation.

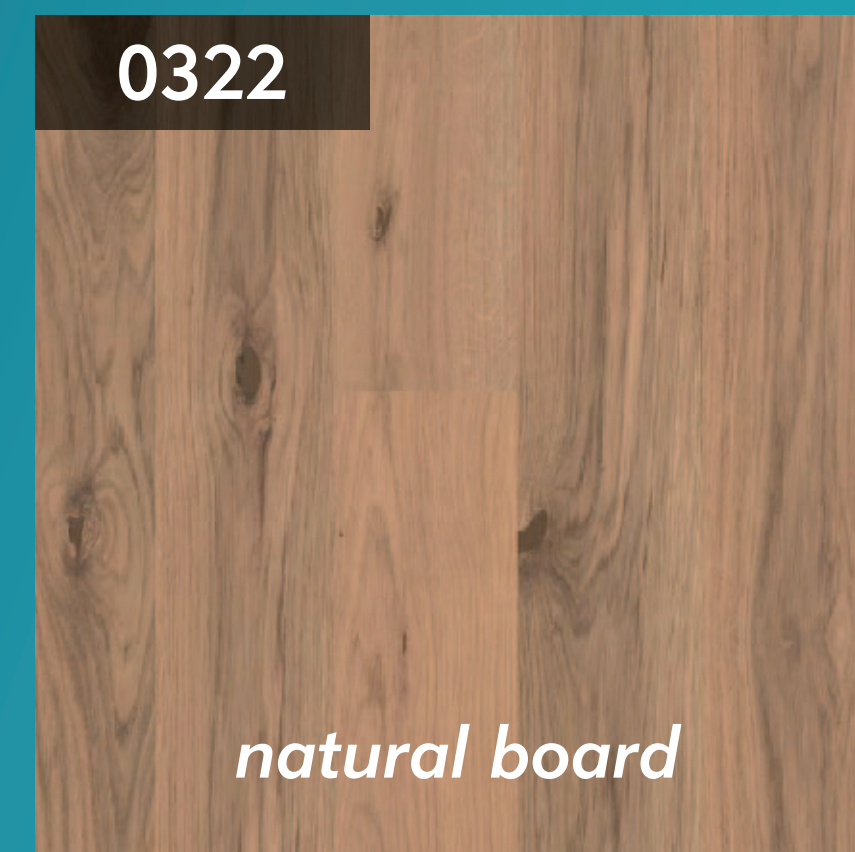

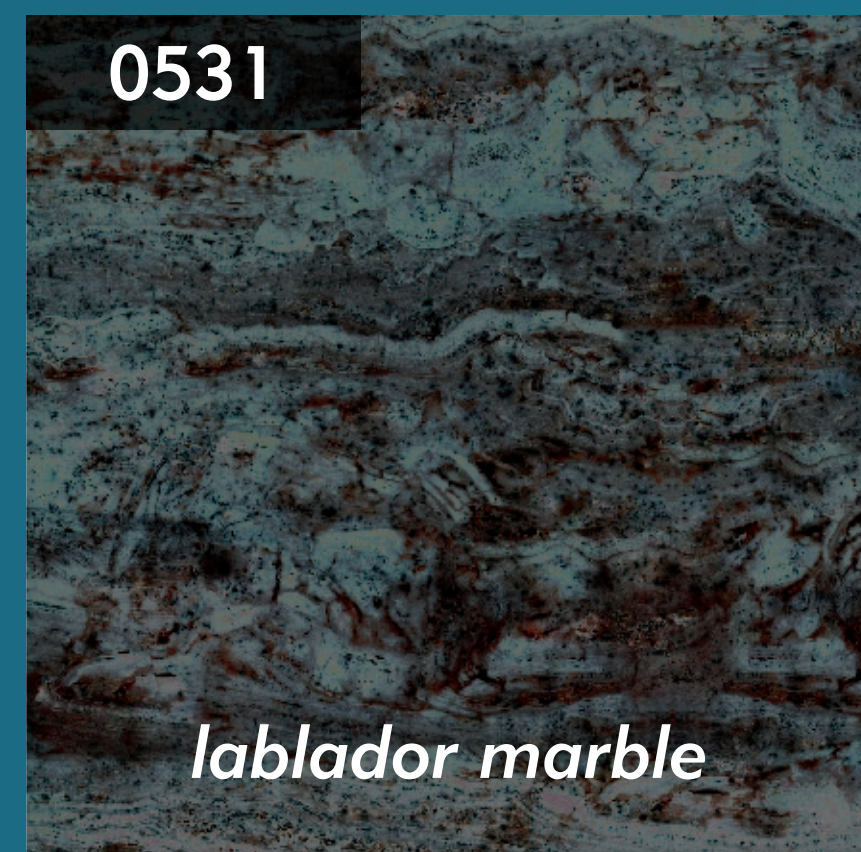

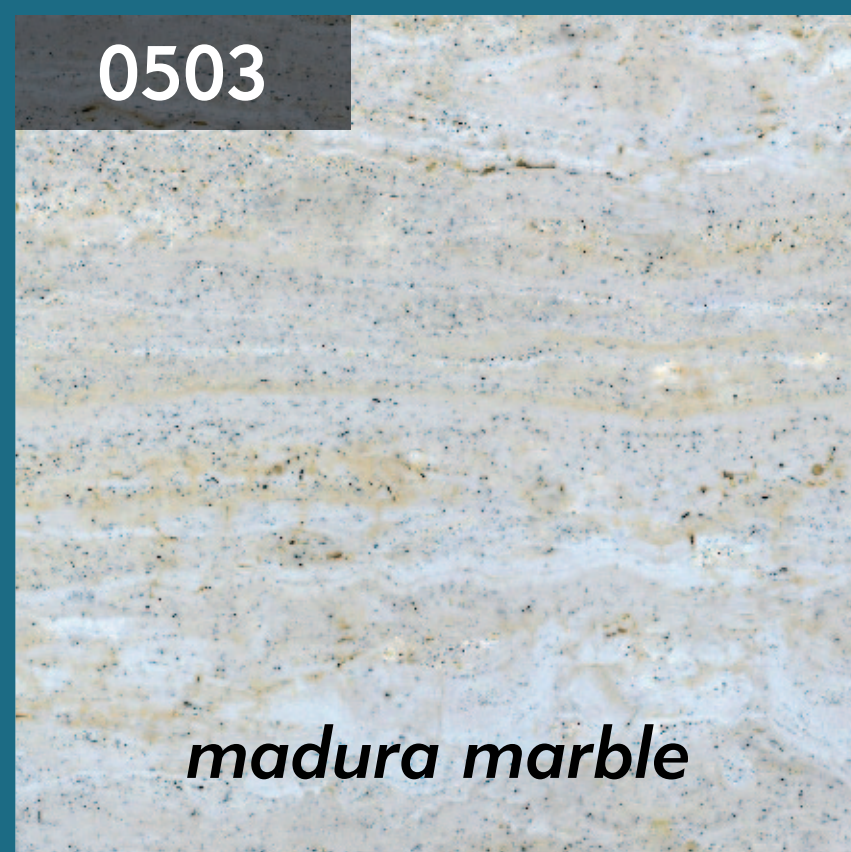

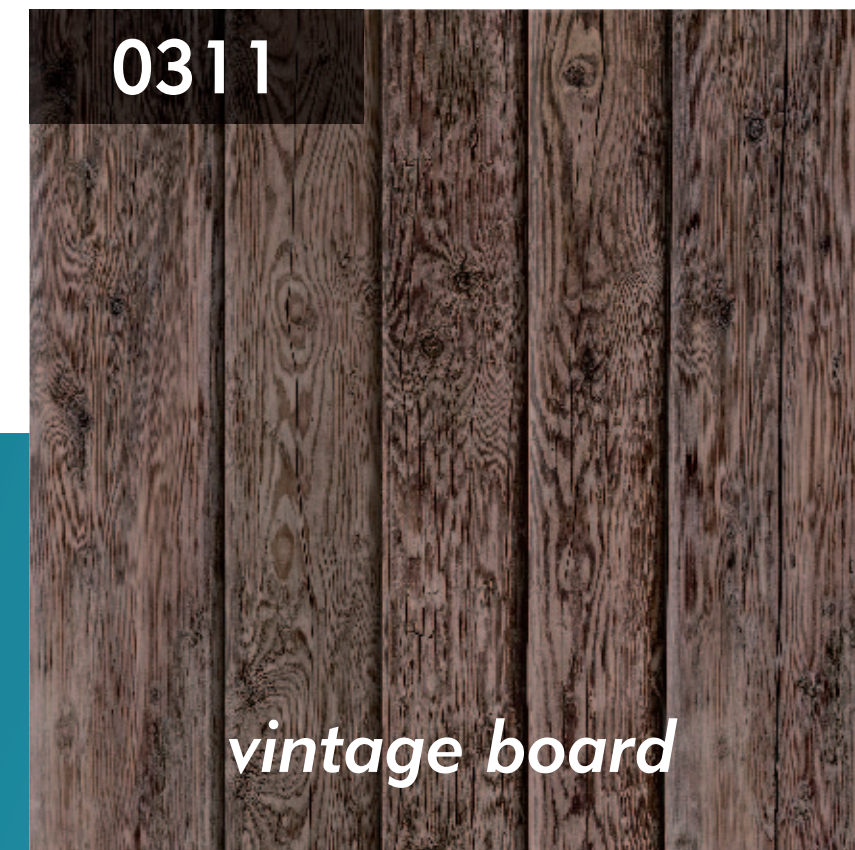

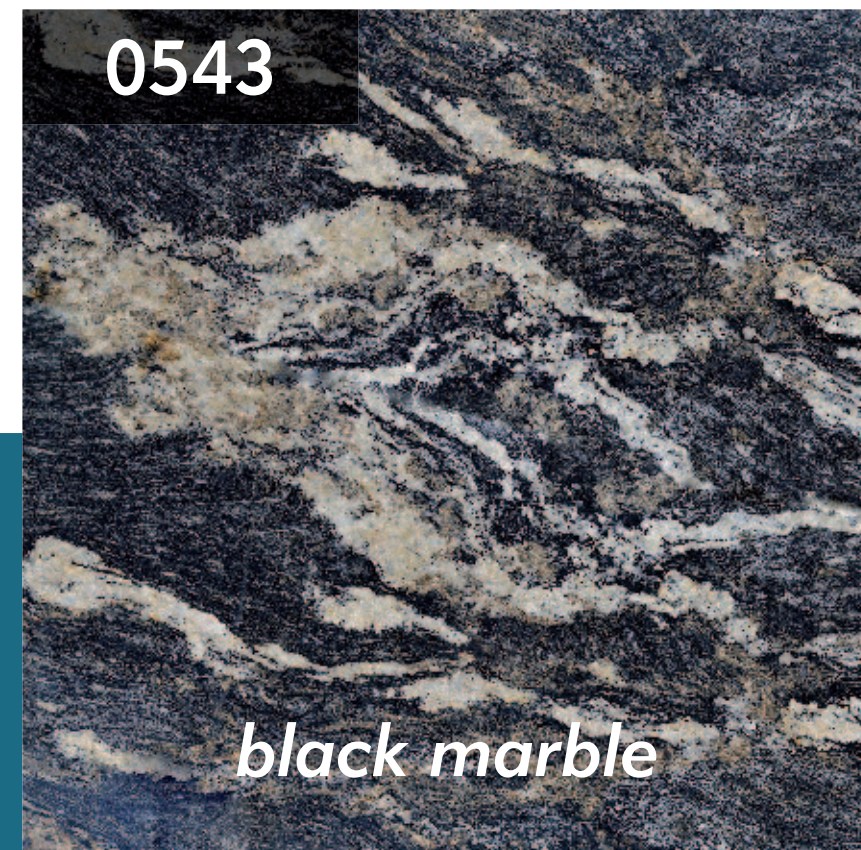

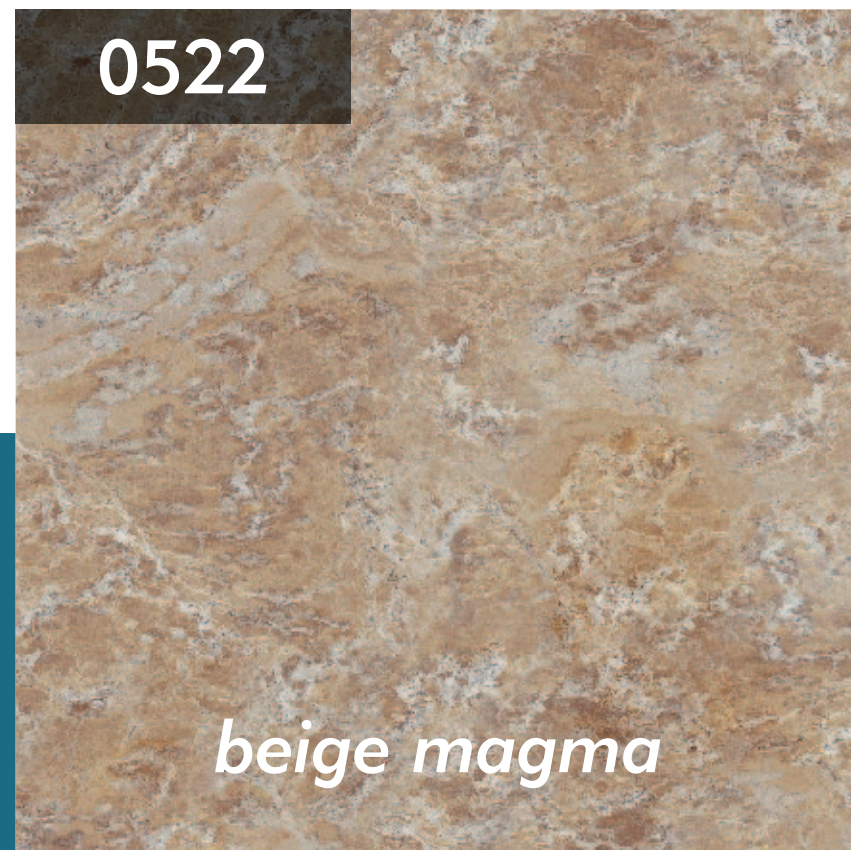

HENDO WALL PANEL
individual pattern

HENDO panels represent high, European design. They are characterized by an original design, attention to detail and high-quality workmanship.

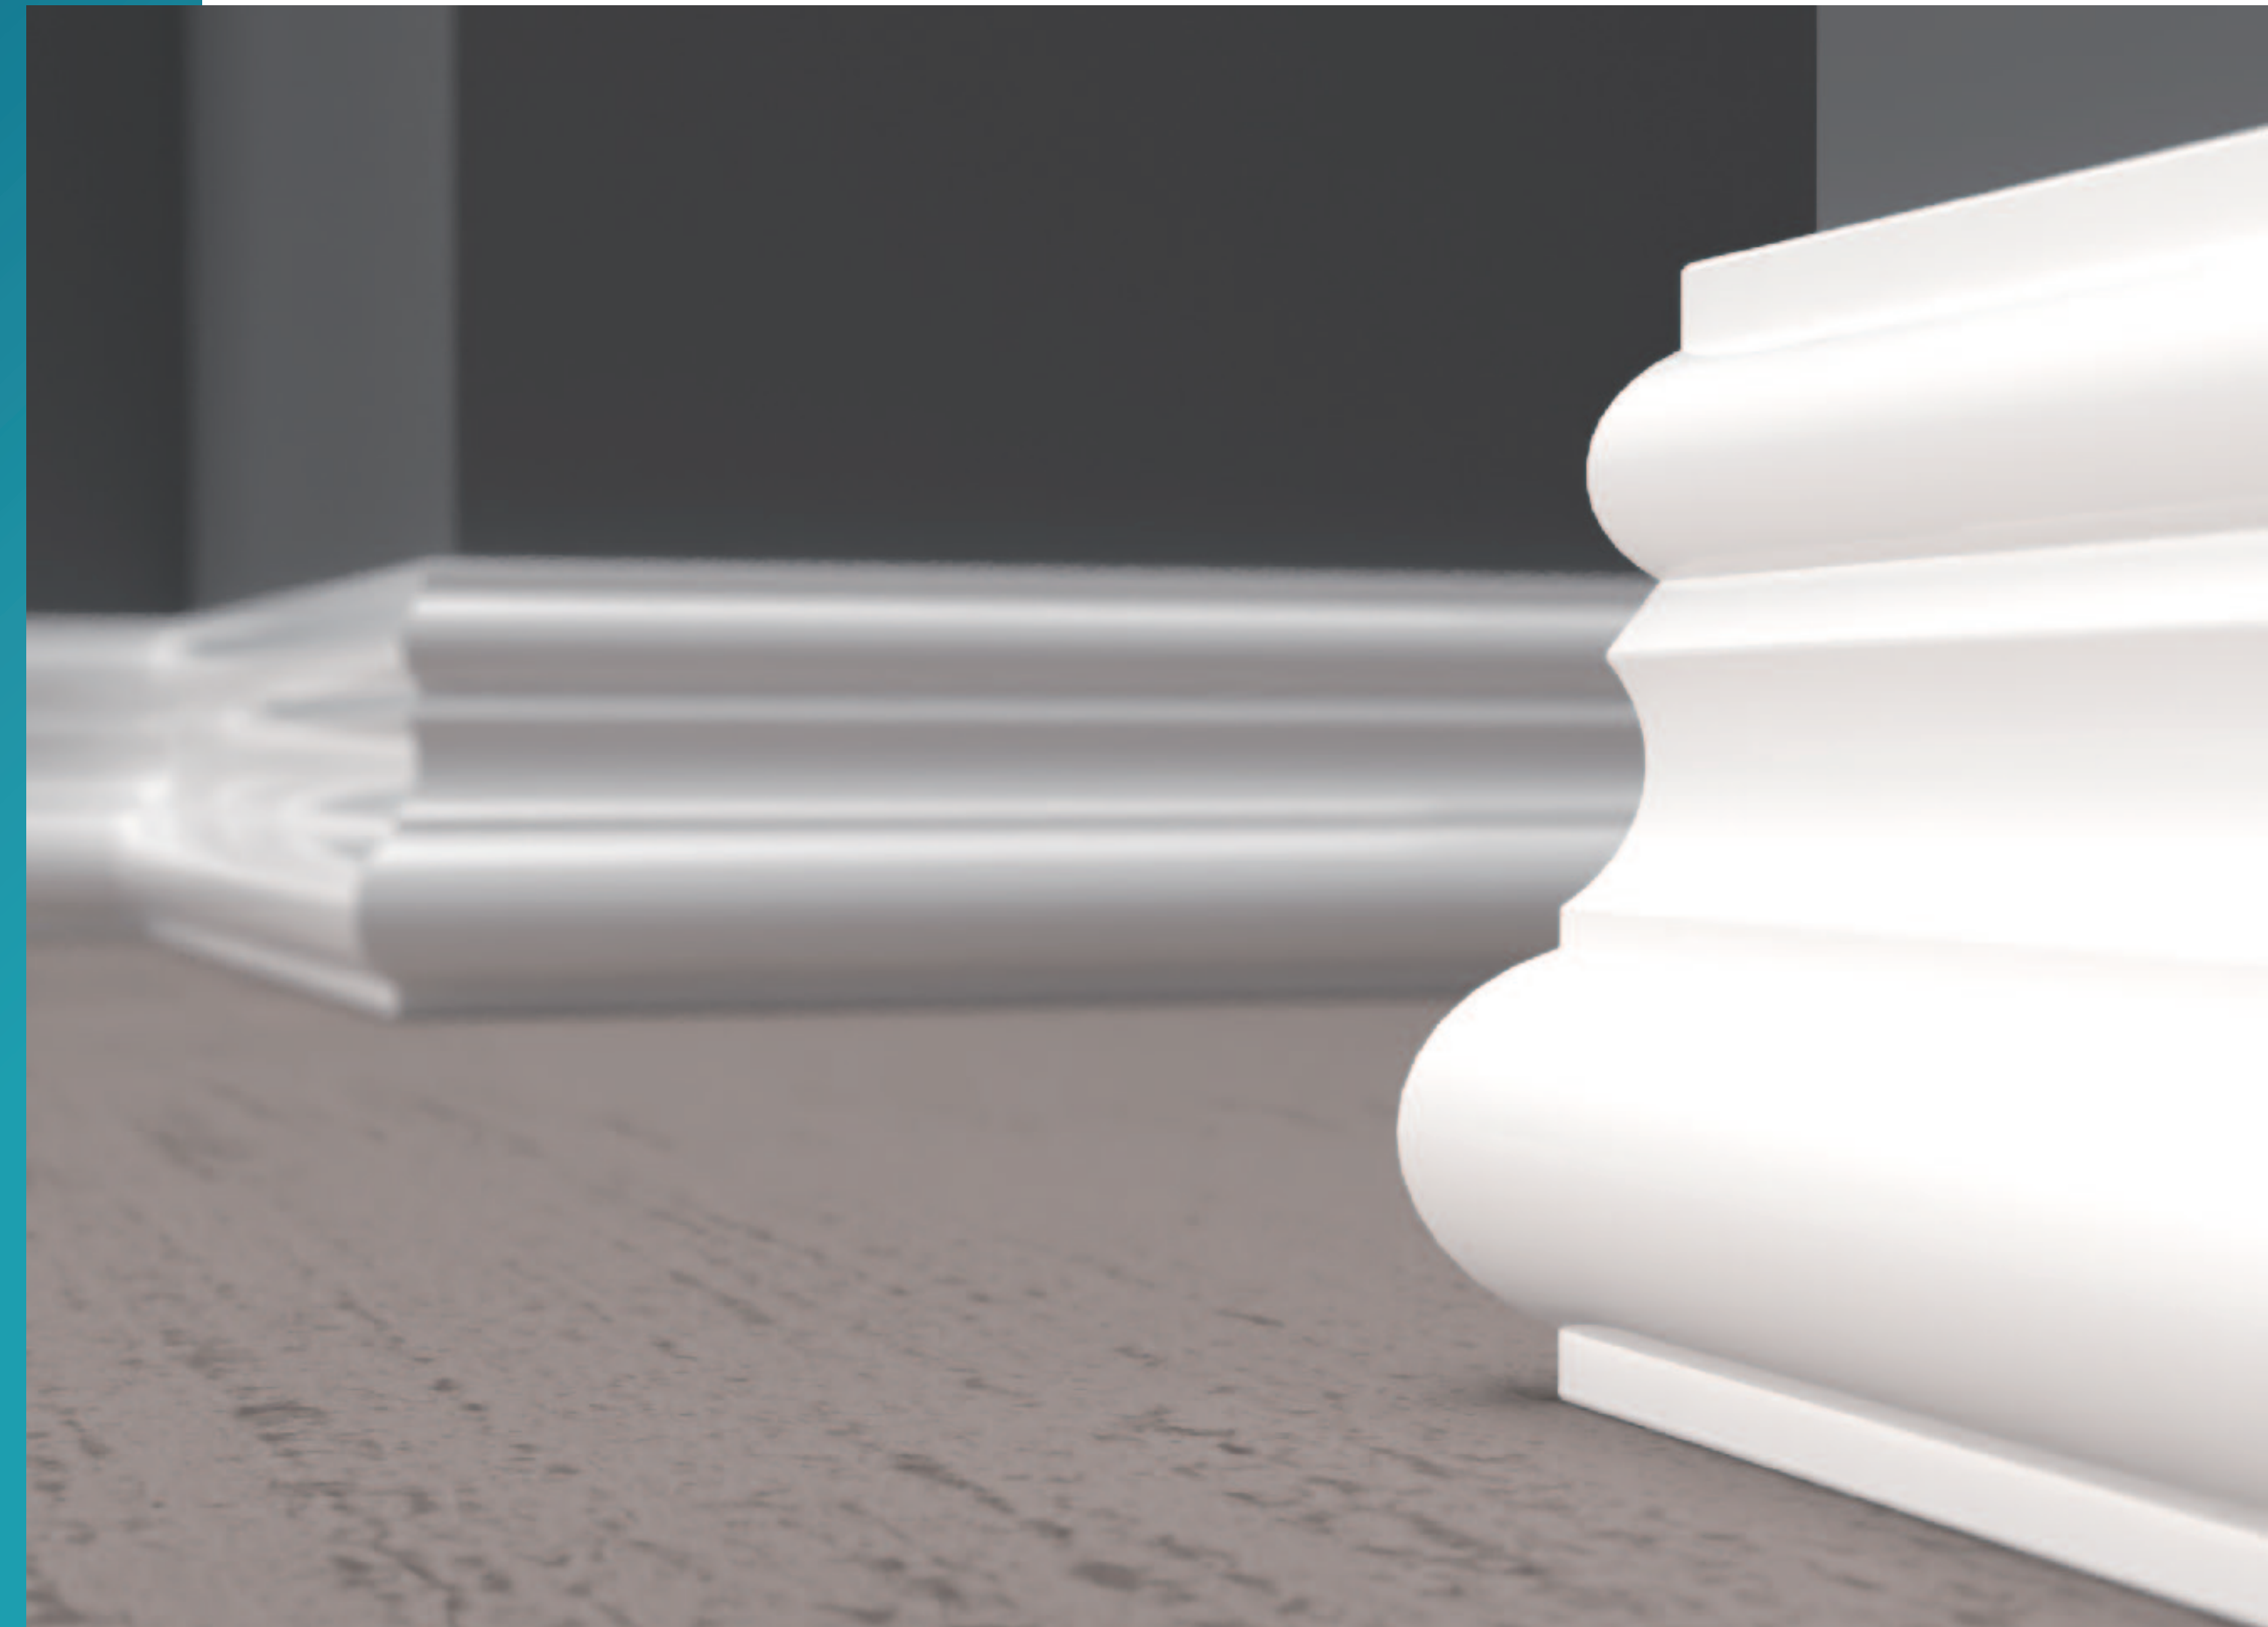

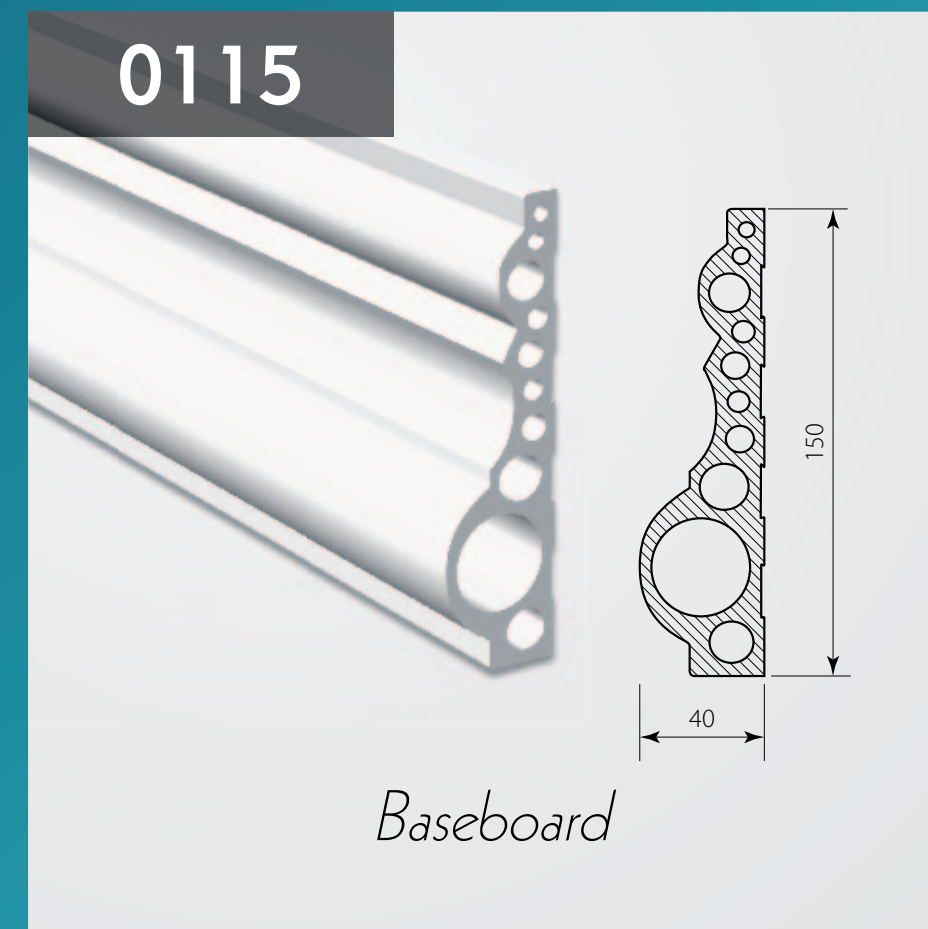

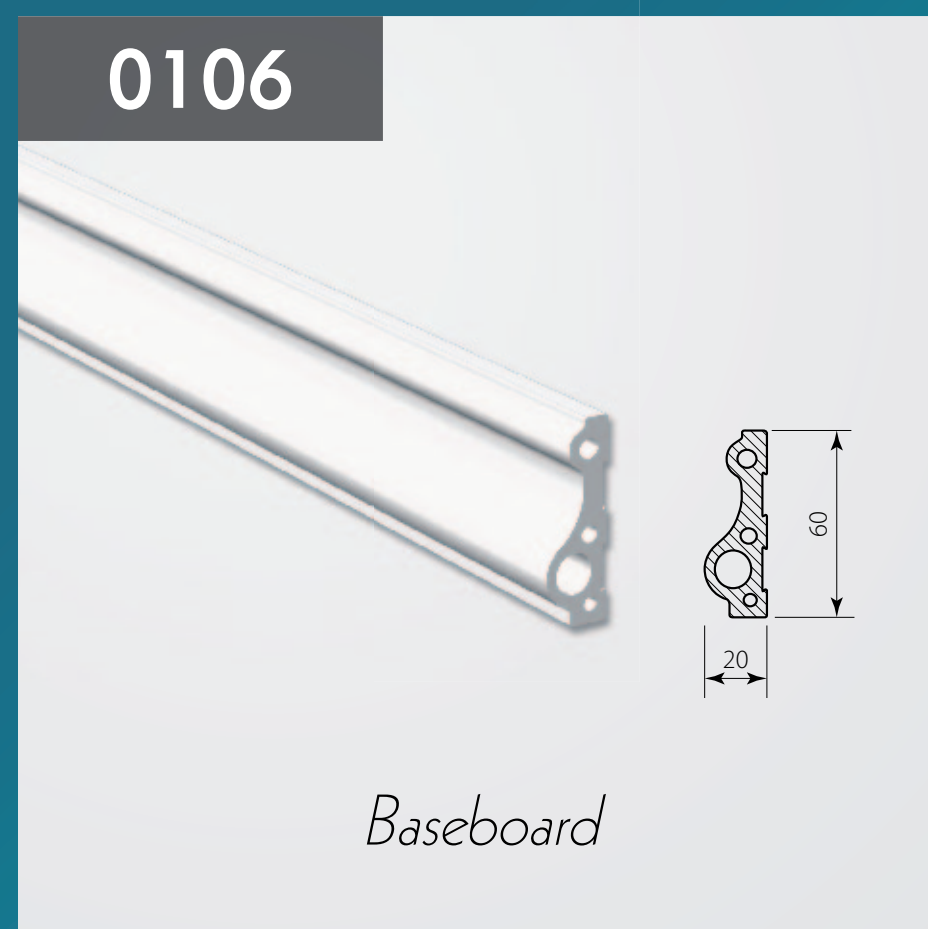

We focus on elegant, luxurious, timeless and sometimes extravagant style of products.

Did you know that you can order your own, original HENDO wall panel pattern and create an interior of your dreams?

More than 100 designs available!

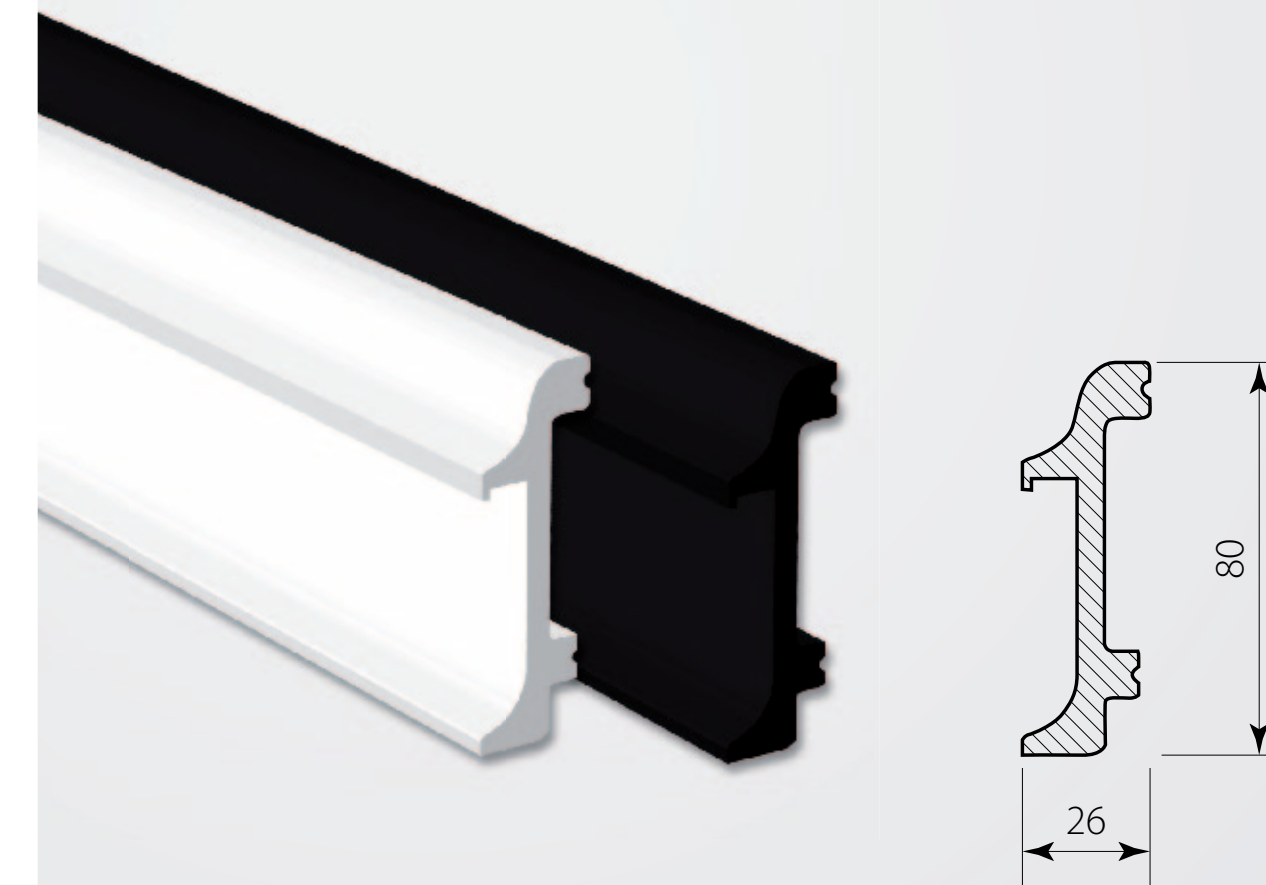

HENDO PROFILES are made on the basis of natural raw materials – minerals with a small addition of binding substances.
